### ARC STAGE SPECIFICATIONS

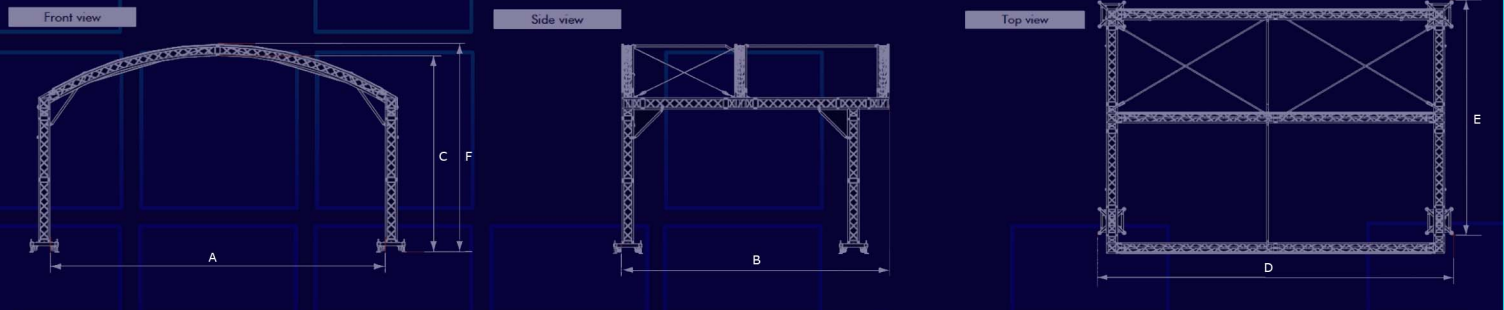

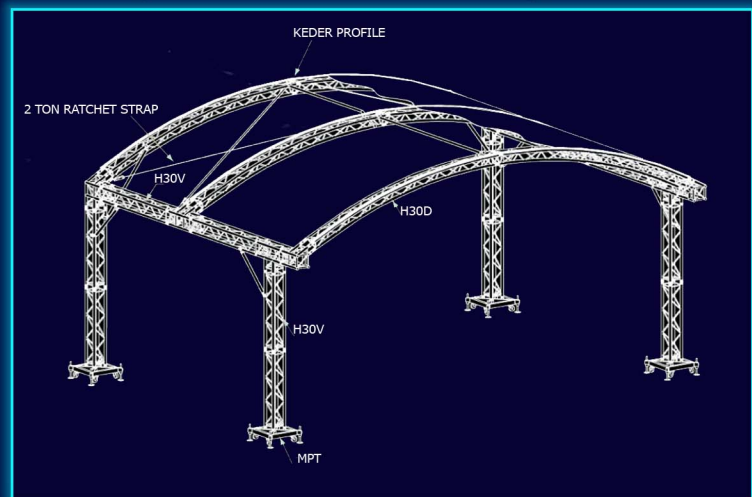

#### SYSTEM DISCRIPTION

The ARC Roof is a fixed construction, based on three inward curved trusses that are mounted to side masts. A hinged connection at the outer ends simplifies the setup of the system. Special corners make the connection between the arches and the main grid. Changing the arches only can make different configurations possible. The arched trusses have a keder profile on top to fit the optional canopy to the truss.

#### TECHNICAL SPECIFICATIONS

Roof dimensions	8mtrs x 6mtrs
Loading capacity (UDL)	2400kg (approx)
Total weight (approx)	600kg (approx)
Max windspeed	28.4m/s, (63.3mp)
Canopy	Side, Back & Top
Canopy Colour	Outside Grey, Inside Black

ARC Roof system	Inside			Overall		
Roof Dimensions	A	B	C	D	E	F
8m x 6m	8.12m	6.42m	4.76m	9.14m	6.15m	4.99m
